

### Sprint 4 Burndown chart:

### Comments

For every sprint, our team plans to reach a planned velocity of 40 story points (8 points per each team member). Sprint 2, the previous sprint, had a velocity that ended up being 27 story points of tasks. During Sprint 3, we were able to complete 37 story points worth of tasks. In sprint 4 we finished all tasks since it was the final one. We're satisfied with the work done.
